## Accurate contour cutting

The CG-SRIII Series of roll-based cutters are available in three widths. These models feature continuous crop mark detection for precise contour cutting. A proprietary half cut function leaves a small bit of backing sheet at connecting points for easier handling. Accurate long-length cutting is enabled through segment compensation.

- Three sizes: 29, 49 and 61 inches
- Continuous crop mark detection
- Half cut function
- Segment compensation
- Over cut function
- Three selectable job speeds
- Media load from front or back
- Remote event notification function
- FineCut8 and SimpleCut software included
